The Cardiosat Series

Cardiac Magnetic Resonance Imaging & Secondary Prevention

Secondary preventative measures can reduce the risk of subsequent cardiac events for individuals who survive myocardial infarction or angina. Dr Thomas Pearson, Professor of Medicine at Johns Hopkins University, outlines risk factor modification strategies and prophylactic drug therapies that decrease the rate of recurring cardiac events. Dr Pearson explores the efficacy of smoking cessation, cholesterol reduction, physical activity, beta blockers, anti platelet agents, and anticoagulants. 60 minutes, order 1-3413

Clues to Unfavourable Outcome Following Acute Myocardial Infarction

Beta blockers' antiarrhythmic and antiischemic properties make them an excellent tool for improving the survival rate among post myocardial infarction patients. Curt Furberg, a researcher with the National Institute of Health, explores beta blocker treatment trials and identifies the efficacious results of Propranolol and Timolol therapies. Dr Furberg also examines the risks, treatment strategies and dosage recommendations associated with beta blocker regimens. 30 minutes, order 1-3847

A Selection of video tapes on surgery

Management of Dental Trauma in Children Vol. 1.6

A leading dentist outlines incision site selection and suture techniques for three preprosthetic periodontal therapies designed to aid in : The placement of a crown on upper central incisors, the installation of a bridge placed on all lower remaining teeth, and the treatment of an amalgam tattoo on labial gingiva over the maxillary right central and lateral incisor teeth. This presentation includes excellent illustrations and videotaped surgery footage. 30 minutes, order 1-3875

Opiates in Anesthesia Vol. 1.3-1.4

Opiate treatments can offset some of the negative consequences of anesthesia and improve patient functioning. Dr, Nabil Fahmy, a researcher and practicing anesthesiologist at Massachusetts General Hospital, explores pharmacokinetics and effects of Morphine, Sufentanil and Fentanyl, Dr. Fahmy outlines pre- and intraoperative uses of these opiates on the cases of opioid analgesia, neuroleptanalgesia, and balanced anesthesia. Fahmy's lecture also

addresses a variety of topics related to these specific opiates including half-life, respiratory depression, biliary pressure, receptors, and endorphines.

60 minutes, order 1-3982

Tendon Transfer to the Hand Vol. 1.1 and Orthopedic Surgical

60 minutes, order 1-887

Value of Thallium Imaging Vol. 1.14

28 minutes, order 1-3704

Professional

268 minutes, order 1-34130-IN

Chin Augmentation

The Cosmetic Surgery Series

If you're not happy with the shape of your chin, plastic surgery can help bring you a solution. Dr Dennis Thompson explains the "chin augmentation" procedure and outlines the excellent results as well as the possible complications associated with the surgery. A woman describes how the procedure felt and why it's made her feel much better about her self image.

"Before and after" photographs of patients along with diagrams of the procedure give prospective patients a good understanding of what to expect from a chin
