17 minutes, order 1-8987-IN

Extension Ladder Safety

The Safety On The Job Safety Series

This collection of safety programs for the telecommunications industry offers information proven to be effective and which meets special telecommunications safety requirements. Each module demonstrates the application of safe work habits to the specific subject matter.

Adult
9 minutes, order 1-8901-IN

He knew better. He just didn't do better. See the dangerous consequences of poor housekeeping on and off the job. See the safe use and inspection of equipment in these compelling, unforgettable videos.

I'm Still Standing

The Basic Safety Series

Featured character Andy Upright adds some attention-getting humorous sequences from the program *Slips, Trips and Falls*. Covers several hazardous situations and avoidance techniques that reveal the causes of slips, trips, and falls, and how to move and work safely.

Adult
14 minutes, order 1-8306-IN

Ladder Safety

Safe use and inspection of step, straight, sectional, trestle, stockroom, fixed, extension, and tubular metal ladders. Reviews the safest technique for taking a fall, potential hazards of and correct methods for climbing, moving, and setting up of ladders.

Adult, Ages 12 to 14, Ages 15 to 18
14 minutes, order 1-8409-IN

Lock Out / Tag Out

Explains a lock out/tag out and how it helps prevent employees from injury when servicing machinery. Provides examples of devices used with electrical, pneumatic, and hydraulic power systems, plus common situations that require precautions or amendments. Explains successful locking devices, proper tag marking and dissipating stored energy, and testing machinery after lock out/tag out has been completed.

Adult
17 minutes, order 1-8311-IN

Safety Housekeeping And Accident Prevention

The Basic Safety Series

A "Safety First" attitude recognizes hazardous conditions. Emphasizes correct operating procedures and safety rules in the handling of tools, chemicals, and personal protective equipment, and being prepared for emergencies.

Adult, Ages 15 to 18
15 minutes, order 1-8302-IN

The Trenching Safety Series

Trenching and Excavation Safety

Live footage and computer graphics provide a clear explanation of the hazards of digging trenches and excavating.

Workers are shown how these hazards are reduced by sloping, shielding, and shoring. Emphasizing personal and work safety, this program is ideal for anyone working in or around trenches.

18 minutes, order 1-8851

Shoring Safely

This program shows how to install timber, screwjack and hydraulic shoring systems. Also illustrates simple techniques for determining A, B, and C type soils, sheeting designs, and safety hazards unique to trenching.

The information presented is perfect for foremen, crew leaders, and anyone needing up-to-date information on how to safely install shoring.

Cave-In Response

Knowing how to respond safely when a cave-in occurs can mean the difference between life and death, especially for the rescuers.

Designed for both on-site and rescue personnel, this program examines the basic considerations involved in responding safely to a cave-in emergency.

24 minutes, order 1-8853

Learning Resources

The Competent Person and Soils Testing

Opening with an inspector arriving at a job site, this program gives the information needed to be a competent person operating within standards.

Topics include: who is considered a "competent person" and what his/her responsibilities are; clear and simple explanations of the new soil classification system; five easy field tests for determining soil types; and how to prepare for and handle an inspection. 27 minutes, order 1-8850

Adult
93 minutes, order 1-88500-IN

Welding Safety In The Workplace

Prevent serious accidents and injuries due to flying sparks, toxic fumes, electric shock and high temperatures associated with welding with this practical, detailed program. Viewers are given the information they need to work safely with an oxyacetylene unit, stick welding, or MIG and TIG operations.

Topics include getting authorization for welding operations; sparking and the risk of fire; guards and protective barriers; hazardous fumes and ventilation; use of respirators; eye protection; personal protective equipment; welding equipment inspection, and welding safety procedures.

A comprehensive Leader's Guide is available.

Working On Ladders, Poles & Scaffolds

The Safety On The Job Series

Includes using the right ladder and setting up properly; inspecting before use; climbing and descending properly; knowing the weight capacities of the equipment, and more.

Closed Captioned
Adult
15 minutes, order 1-8034-IN

Working On Lifts, Cranes & Swing Stages

The Safety On The Job Series

The importance of inspecting equipment before work begins, warming up engine and hydraulic systems before operation, maintaining safe clearances from electrical current, wearing hard hats and safety gear.

Adult
15 minutes, order 1-8035-IN

Working Safely With Compressed Gas Cylinders

In today's work environments, compressed gas is used for many things: refrigeration, welding, heating, and much more. Compressed gas cylinders can be dangerous, however, and employees who work with them need to know how to handle them properly.

This video provides the information employees need to work safely. Topics include: the hazards of compressed gas cylinders, fittings and connections, moving and transporting cylinders safely, positioning cylinders properly, and safe storage practices.
