Aids And Hepatitis B Prevention For Long Term Care

The Universal Precautions Series

This basic five part video, along with the accompanying workbook, identifies sources and methods of transmission of HIV and HBV in the workplace. Universal precautions is explained as it relates to all health care workers, describing not only protective equipment available for use in various health care settings, but safe work practices as well. Reviewed by OSHA (U.S.A.), the CDC and APIC, this program will help your institution meet current infection control requirements. Tailored especially for long term care workers. Ideal for self directed learning programs. Produced by Medcom.

A selection of videotapes for hospital staff on issues of safety and hospital security

Basic Principles Of Electrical Safety

Potential electrical hazards can be dangerous for both the EEG technologist and the patient. This program reviews basic safety information related to the four concepts that govern the flow of electricity; current, voltage, resistance, and grounding. Also discussed are tests for ensuring equipment safety, the degrees of electrical shock, and rules for protecting the patient from electrical hazards.

Electricity: Friend Or Foe

When used correctly, electricity performs vital functions in the health care setting. But when misused, electricity can become a health care worker's worst enemy. This film helps your staff understand the basics of electricity, identify the potential hazards of electricity and recognize the precautions they should take to avoid electrical shock.

The program teaches practical steps to prevent shocks ... from checking patient areas for wetness or moisture to knowing how to properly use electrical equipment. It stresses that health care workers must exercise extra caution with patients with pacemakers, IV tubes or other devices that penetrate the skin.

Electricity: Friend Or Foe? also teaches that health care workers must be alert to guard against electrical hazards.

Specific topics covered include: the effects of static and current electricity; why some patients are at increased risk for electrical shock; how to avoid electrical shocks in the hospital and emergency procedures in an electrical accident.

When Fire Strikes: A Video For Commercial Kitchen Employees

The video is designed as a training tool for employees of schools, hospitals, restaurants, and other facilities where the public gathers. The 15-minute program shows employees how to evacuate safely while assisting visitors in a fire emergency. Special segments cover: crowd management, assisting people with disabilities, fire exit strategies and maintenance of fire safety systems.

Divided into three special segments, it sends a strong safety message employees will remember.
