Binge Drinking Blowout: The Extreme Dangers Of Alcohol Abuse

Binge drinking is just part of the fun as these young people encourage each other to participate in drinking games.

See the realities of drinking too much and the physiological effects of alcohol poisoning.

Actual cases of fatality and permanent injury caused by binge drinking are presented in an effort to make young people see that binge drinking is nothing more than a one-way street to tragedy.

Actual outcomes, causes and effects of abuse. Here is our selection of video resources for youth, adults and caregivers.

Bitter Pills: Prescription Drug Abuse

The Street Scene Series

The most widespread drug problem today, prescription drug abuse is growing at an alarming rate. While helpful to those with a medical condition, prescription drugs can create a world of madness for those who abuse them.

This honest, in-your-face documentary takes you to the streets. It's hosted by Hip-Hop artist "The Q" in a no-holds-barred style. Recovering addicts, many of them school-age themselves tell how they got hooked, and how prescription drug abuse ruined their lives, leading to jail, sexual assault, overdose and the deaths of those they loved.

The legal consequences for those caught with prescription drugs, especially those bought on the internet, are explored. Drug counselors, themselves recovered addicts, expose how dependence and tolerance can lead to addiction and a fatal overdose.

22 minutes, order 9-0051-IN

Building Up For A Fall: Teens And Steroids

This program illustrates the dangers of anabolic steroid abuse for all young adults, especially male athletes. The attraction of steroids lies in building body size, over-achievement in athletics, body image and sexuality. However, the dangers are many including adverse physical affects such as acne, psychological damage, mood swings, depression and out of control violence.

Curriculum Correlations:

Club Drugs - Dancing With Danger

Visit the street outside a "rave" where young people explain why adding club drugs to the mix means you're "dancing with danger". Listen to recovering users talk about drug-related physical and mental disorders, prison, isolation from friends and family, attempted suicides and murders.

Learn the truth about common club drugs including dangerous substitutes being passed off as "Ecstasy", powerful sedatives like "roofies" (Rohypnol) and GHB used in date rapes and the resurgence of LSD and Methamphetamines.

This hard-hitting video shows the dangers posed by unregulated pills with unknown ingredients, the deadly peril of combining pills with alcohol or other drugs and offers insights on how to avoid substance abuse problems and where to go for help and support.

Coping With Pressures

The Power Of Choice Series

Teens discuss the pressures they face, from academic competition to peer acceptance and parental expectations. They explore ways of

keeping pressures in perspective and handling those pressures in ways that serve their best interests.

30 minutes, order 5-2149-IN

Dealing With Pressures

The Big Changes, Big Choices Series

Becoming a teenager opens the door to a whole new batch of pressures. Cover the most common sources of pressure along with positive, healthful ways to cope with it.

30 minutes, order 5-2175-IN

Decide To Be Drug Free

Children with a sense of self-reliance and strong refusal skills are able to resist peer pressure and ignore advertisements that make cigarette and alcohol use appear glamorous, cool, and "grown-up". Learn lots about cigarettes, advertising, alcohol and making healthy decisions.

19 minutes, order 2-5121-IN

The Downward Spiral: Oxycontin & Opiate Addiction

The Street Scene Series

OxyContin abuse has grown faster than any other prescription drug in decades. Thousands of teens and young adults have overdoses. In some treatment facilities, 50 to 90 percent of those seeking treatment name OxyContin as their primary

drug of abuse. Oxy's and other opiates like Vicodin and Codeine are getting users addicted to morphine and heroin.

Many begin taking the pills for a medical condition and end up getting hooked. Others take them for "recreation" believing it's just another pill, only to find that it is a "take-over-your-life" pill.

Chemical dependency counselors, former addicts, and family members show how to escape the terrible grip of these opiates and where to go for help.

19 minutes, order 9-0050-IN

Drug Use And Addiction

The Teen Files Flipped Series

Self-absorbed teens Cory and Eva prefer the "high" life, using drugs to achieve it. Eva's chief goal in life is fun, while Cory's is to avoid his mother's nagging. When they are "flipped", Cory is emancipated from his mom and Eva is asked to host an MTV program. The teens subsequently become involved with heavy drug users who steal to support their habit, suffer withdrawal and overdose themselves into the hospital. This, and additional revelations about HIV infection and drug-induced brain damage, convince the teens to swear off drug use and reconcile with their families.

In The Know Series

The In The Know Series

This stylish multimedia format really reaches out to young people and keeps them "in the know". An effective part of your comprehensive drug abuse prevention program.

Cocaine and Crack

Exciting graphics, expert testimony and four young narrators work together to educate viewers about the devastating effects that cocaine in all of its forms has on abusers' social functioning and physical and mental health.

The program first describes the difference between powdered cocaine and crack. It goes on in detail about the social effects, biological functions, and short- and long-term effects of cocaine, whether it is sniffed, injected or smoked.

Hallucinogens

Exciting graphics, expert testimony and four young narrators work together to educate viewers about the real dangers of using the commonly abused hallucinogens LSD, psilocybin/psilocyn mushrooms and mescaline/peyote. Also discussed is phencyclidine (PCP) an anesthetic/hallucination/mutant drug that can lead to psychosis. Describes how these drugs can endanger viewer's lives and make lasting impacts on their mental health.

The program details the social effects, biological functions, and short- and long-term effects of each of these substances.

Party Drugs

Exciting graphics, expert testimony and four young narrators work together to educate viewers about the tremendous damage that Ecstasy/MDMA, methamphetamine, GHB, Rohypnol and Ketamine do to users' lives. Also contains an in-depth look at the frightening trend of "date rape" drug use and provides advice to viewers on protecting themselves.

The program details the social effects, biological functions and short- and long-term effects of each of these substances, and concludes with the tragic story of a college freshman who has spent the last three years in a coma due to someone "slipping" GHB to her without her knowledge.

Prescription Drugs

Exciting graphics, expert testimony and four young narrators work together to educate viewers about the unfamiliar, but terrible risks of prescription drug abuse. Shows the viewer the traumatic damage that unauthorized use of pharmaceutical drugs can do to their social functioning and physical and mental health.

The drug groups discussed are tranquilizers (barbiturates and benzodiazepines), stimulants (amphetamines), and opioid painkillers (Vicodin, OxyContin, and the like). The program details the social effects, biological functions and short- and long-term effects of each of these substances.

Tobacco, Alcohol and Marijuana

Exciting graphics, expert testimony and four young narrators work together to educate viewers about the tremendous damage that tobacco, alcohol and marijuana do to users' lives. Viewers may not be aware that more than half a million people are killed every year by tobacco and

alcohol. Also mentioned is the dramatically increasing odds that a user will often go on to abuse cocaine and heroin.

The program details the social effects, biological functions, and short- and long-term effects of each substance. Finally, a survivor tells how her family was torn apart by a drunk driver.

Maslow's Hierarchy Of Needs

Everyone is motivated by something. Dr. Abraham Maslow's theory is that human beings are motivated by unsatisfied needs. Once basic level needs such as shelter and safety, have been achieved, the individual can pursue higher level needs. Exploring Maslow's theory one will find a tie to the preoccupation of drug use and the negative effects that result from alcohol/drug addiction. Since addiction is a progressive illness it destroys a person's ability to achieve self-actualization,

eventually destroying the person's ability to meet his or her other needs - including those of self-esteem, the love and acceptance of others, safety and even the basic requirements of food and shelter.

The Real True & False About Alcohol, Marijuana & Inhalants

The impression many middle school students have about drugs is that "everybody does it". That misinformation may influence students to take their first step through the gateway provided by alcohol, marijuana or inhalants. Hosted by a multi-ethnic group of high school students, this engaging, fact-filled program uses a lively "pop quiz" to hear that the social norm for the vast majority of teens is that when it comes to alcohol and other drugs, they "don't need 'em, don't want 'em, and don't use 'em".

Curriculum Correlations:

AB Health and Life Skills Gr 7 Personal Health:

"analyze social factors that may influence avoidance and/or use of particular substances; AND Gr 8 Personal Health: "analyze possible negative consequences of substance use and abuse;"

BC Career and Personal Planning Gr 8 Personal Development - Substance Abuse:

"describe peer, mass media and social influences related to substance use and abuse" AND Gr 9 Personal Development - Substance Abuse: "evaluate peer, cultural, mass media and social influences related to substance use and abuse."

ON Health and Physical Education Gr 6 Healthy Living - Substance Use and Abuse:

"describe the short and long term effects of cannabis and other illicit

drugs;" AND Gr 7 Healthy Living - Substance Use and Abuse: "outline a variety of issues related to substance use and abuse; apply a decision-making process to make informed choices regarding drug use." AND Gr 8 Healthy Living - Substance Use and Abuse: "apply the steps of a decision-making process to address age-specific situations related to personal health and well-being in which substance use or abuse is one of the factors."

Ruined Lives: The Dangers Of Methamphetamine

Methamphetamine, also known as speed, ice, crystal and meth, is a highly addictive drug. It allows the user to stay awake for long periods,

reduces appetite and keeps the user "high" for a relatively long time. It also is extremely dangerous with potentially lethal short-term and long-term effects.

This program includes the dramatic story of a young woman who tries "meth" for the first time, and the tragic, life-altering consequences of that act. Interviews with individuals whose lives have been affected by methamphetamine abuse, lend a peer group reality to the program.

Curriculum Correlations:

AB Career and Life Management (Senior High) Personal Choice: *"assess the effects of substance use and abuse - tobacco, alcohol, drugs - on health."*

BC Career and Personal Planning 8-12 Personal Development - Substance Abuse Prevention: *"to develop in students the ability to make responsible decisions regarding substance use as they develop healthy lifestyles; demonstrate an understanding of the effects and consequences of substance use and abuse for themselves and others."*

ON Health and Physical Education Gr 9 & 10 Healthy Living - Substance Use and Abuse: *"explain the effects, the use and abuse of drugs; identify facts and myths related to use; identify major factors that contribute to use; demonstrate and use decision-making skills."*

Running On Empty: Teens And Meth

Viewers may or may not be familiar with the drug methamphetamines, commonly referred to as "meth", but its popularity is rising steadily among teenagers. This gritty video explains what meth is and how it becomes addictive.

Jamie, a young woman, explains in detail how she became involved with meth and how it made her lose out on a big portion of her life. This presentation demonstrates that although our society is fast-paced and hectic, meth is no way to cope with pressure.

The Truth About Alcohol

This is an upbeat, informative and to the point program which begins with an overview of how many lives are affected by alcohol, especially teens.

In addition to a brief history of alcohol demonstrating how it's use has risen, the program discusses the power of advertising and the media and how they create false and misleading messages in order to sell their product.

Many of the myths about alcohol are dispelled through the tape with the presentation of graphics, statistics, dramatizations, and hard facts.

The Truth About Drinking

The Teen Files Series

Teens who are current drinkers see first hand what the future may hold for them if they continue to drink. Viewers experience the potential consequences of alcohol use from every perspective: how drinking impairs a person's coordination, vision and reaction time; how the brain and other organs suffer permanent damage from alcohol use; how a drunk person really drives; and how drinking can lead to months in a rehabilitation center.

The grim reality is that alcohol is the number one killer of teens. By the close of the program, all the young participants are moved to stop their reckless drinking behaviour.
